

Year 5 - Lesson 4 - History of Computing

Introduction:

You will need to print this document if you can so that you can write on it. If you cannot print, please use a piece of paper to write on.

PLEASE WRITE YOUR NAME	
------------------------	--

Task 1:

Read the document THE HISTORY OF COMPUTING that is included with this lesson.

Task 2:

Refer to the document you have just read to try and answer the following questions:

1. In what year was the World Wide Web invented?
2. What is an abacus known as in Japan?
3. What year did we see the rise of the game Space Invaders?
4. Where did Alan Turing work on codebreaking, which helped to shorten WWII?
5. In 1975 Bill Gates founded the company Microsoft with somebody else, who was it?
6. How much did a Raspberry Pi cost in 2012?
7. In what year did Apple produce a portable computer?
8. When was the word "computer" first used?
9. Who created an algorithm in 1842 making them the first computer programmer?

Task 3:

See if you can find all of these computing terms and words in the word search.

ABACUS

ALGORITHM

BLETCHLEY PARK

COMPUTER

INNOVATIVE

PROGRAMMING

MICROSOFT

APPLE

SPACE INVADERS

IPOD

CODING

RASPBERRY PI
