

# Year 5 - Lesson 6 - Animation

In this lesson we will learn about animation and try to create our own.

**TIP:** When you have completed tasks in this lesson click BACK on your browser rather than close the page.

## Task 1:

Let's find out a little bit about the history of animation.

Please click [HERE](#) to watch this video

## Task 2:

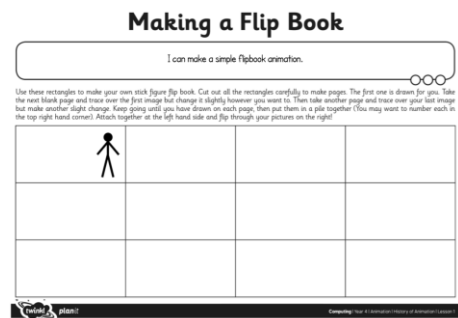

One of the early types of animation used was the flip book. Let's watch some examples.

Please click [HERE](#) to watch this video

## Task 3:

Print out the Making a Flip Book activity sheet and then use it to try and make your own flipbook. You can print off as many sheets as you would like depending on how long you would like your animation to be.

## Task 4:

We will try to use 'Stop Frame Animator' to see if we can make our animations online. We will need to watch another video to learn how to use it.

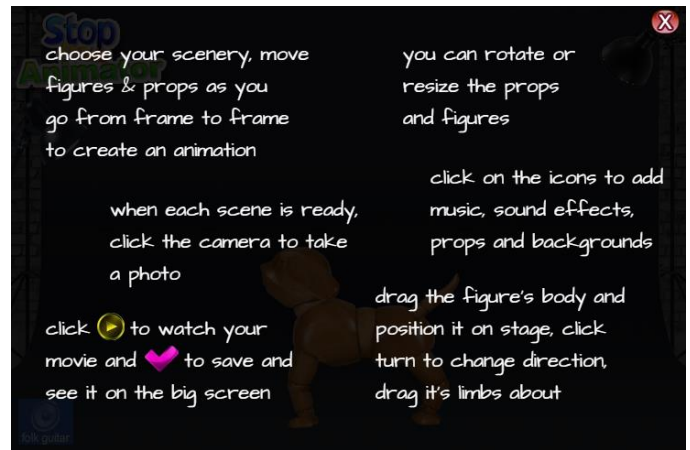

Please click [HERE](#) to watch the video.

**Task 5:**

Now have a go at creating your own animation using 'Stop Frame Animator'.

Please click [HERE](#) to load the site.

**Task 6:**

One of the most popular and fun ways to create animations nowadays is to use Stop Pro Animation. One of the easiest ways to do this is with a mobile device. You will learn more about this next year in school but if you do want to have a look at a recommended app, do click [HERE](#).

Stop Motion Studio  
**Let's Make a Movie.**

If you have completed the lesson and still have time left, do try creating another flipbook or another animation using Stop Frame Animator.

# Making a Flip Book

I can make a simple flipbook animation.

Use these rectangles to make your own stick figure flip book. Cut out all the rectangles carefully to make pages. The first one is drawn for you. Take the next blank page and trace over the first image but change it slightly however you want to. Then take another page and trace over your last image but make another slight change. Keep going until you have drawn on each page, then put them in a pile together (You may want to number each in the top right hand corner). Attach together at the left hand side and flip through your pictures on the right!
