

Years 7&8 - Lesson 3 - Google Maps Letters

This lesson hopefully contains a fun activity you will enjoy. You will use various computing skills to search, download, crop and assemble a collage using Google Maps.

Introduction:

Search GOOGLE MAPS to find LETTERS to create fun WORD collages.

Task 1:

Can you see my name, MR SHONE, in the following collage of Google Maps Screenshots?

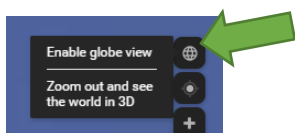

Task 2:

Try to create your own collage spelling either your name or a pets name or any word/s you would like.

Use the following link to open GOOGLE MAPS in SATELLITE view.

<https://maps.google.com/?t=k>

Enable GLOBE view if you would like to be able to rotate the map using CTRL key and dragging your mouse.

Use Google images and then use the SNIPPING TOOL if using Windows 10 on a PC. If using a different device, try taking screenshots and use the cropping tool.

Once you have the images you require, use software of your choosing to assemble your collage

If you are happy with your collage please share it with us, we may even include some of them on the schools FACEBOOK page.
