

Years 7&8 - Lesson 7 - Back To Python

We are returning to learning Python in this lesson but using our school iPads.

<p>Task 1:</p> <p>Please check your iPad to ensure that the PYTHON LAB app is installed.</p> <p>If it is not installed please contact itsupport@townclose.com for assistance.</p> <p>Please load the app PYTHON LAB.</p>	
<p>Task 2:</p> <p>Scroll through the 4 introduction screens then click on START LEARNING.</p> <p>Type in your name as requested and then click on CONTINUE.</p>	
<p>Task 3:</p> <p>Click on PYTHON BASICS</p> <p>You will cover a lot of information in this section that we covered in previous lessons, however, it will be useful to go over it again to ensure you have a good understanding of the basics.</p> <p>Try to complete all 10 steps in the PYTHON BASICS section.</p>	<p>NOTE:</p> <p>In some sections you will need to TYPE an answer and in others you will need to CHOOSE an answer. For some sections there will be a choice of answers and others only one option.</p> <p>Do take time to understand each step rather than flick through at speed.</p>
<p>Task 4:</p> <p>If you have completed Python Basics, do move on to and try to complete the next section, VARIABLES AND TYPES.</p>
