

Green-

Toppings at the icecream shop cost 5p each.

Look at how much each child spent and work out how many toppings they bought for their sundae. Fill in the number lines and number sentences.

Cut out the boxes and stick them in your book in order from the lowest number of toppings to the highest. What do you notice?

Sarah spent 30p.

$$30 \div 5 =$$

Malik spent 10p.

$$10 \div 5 =$$

Abbas spent 5p.

$$5 \div 5 =$$

Hardeep spent 55p.

$$55 \div 5 =$$

Harriet spent 45p.

$$45 \div 5 =$$

Natalia spent 20p.

$$20 \div 5 =$$

Magda spent 15p.

$$15 \div 5 =$$

James spent 40p.

$$40 \div 5 =$$

Amrit spent 25p.

$$25 \div 5 =$$

Zayan spent 60p.

$$60 \div 5 =$$

Instructions

- Look at how much each child spent and make a matching card with a number sentence.
- Cut out all the cards and place them face down on the table.
- Turn over 2 cards. If they make a matching division sentence, you can keep them. If not, turn them back again.
- Now your partner has a turn. The player with the most cards in the end is the winner.

Sarah spent 30p.	$30 \div 5 =$
Malik spent 10p.	$10 \div 5 =$
Natalia spent 20p.	$20 \div 5 =$
Magda spent 15p.	$15 \div 5 =$
Harriet spent 45p.	

Gurleen spent 50p.

Amrit spent 25p.

James spent 40p.

Zayan spent 60p.

Abbas spent 5p.

Ben spent 35p.

Hardeep spent 55p.

Extra Challenge

1

Harry buys more than 6 toppings but less than 10. He buys an odd number of toppings.

How many might he have bought?

Extra Challenge

2
